Main Windows

The following is the screen shot of Qsyncer2.

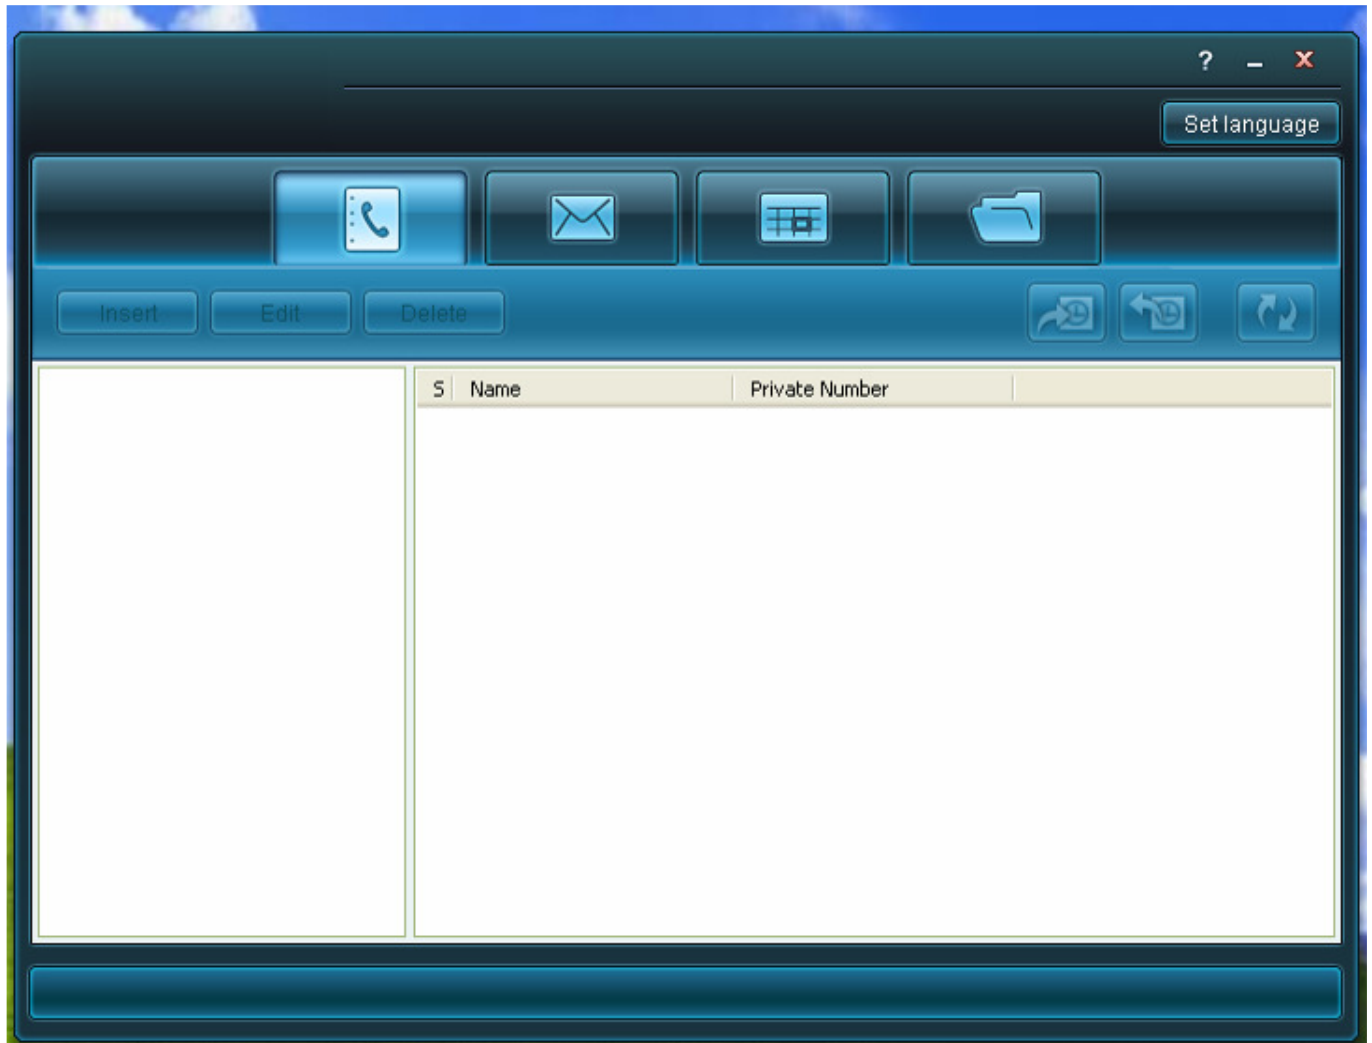

Figure 1

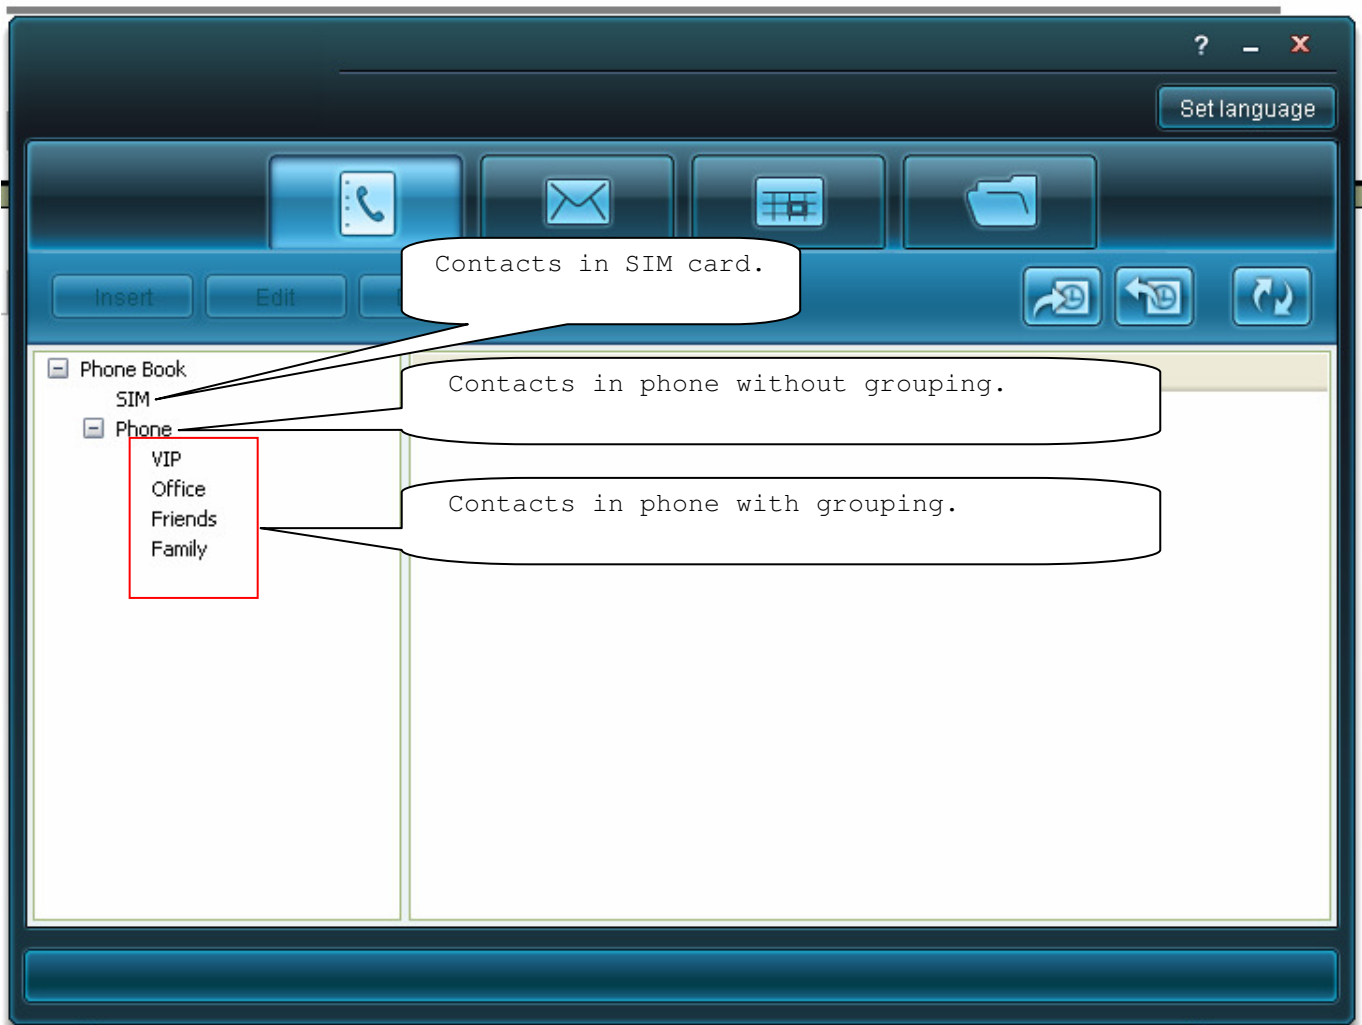

In Qsyncer2, there are 5 functionalities:

1. Change UI to a different language on the fly.
2. Manage contact information in the mobile phone and SIM card and synchronize with Outlook. (Please add information about supported Outlook version).
3. Manage SMS in the mobile phone and SIM card.
4. Manage schedule (Event) in the mobile phone and synchronize with Outlook.
5. Exchange data (MP3, Ring tone, and pictures) between the mobile phone and the PC.

Phonebook

There are three kinds of contacts.

1. Contacts in SIM card.
2. Contacts in the mobile phone with grouping.
3. Contacts in the mobile phone without grouping.

Graph 2

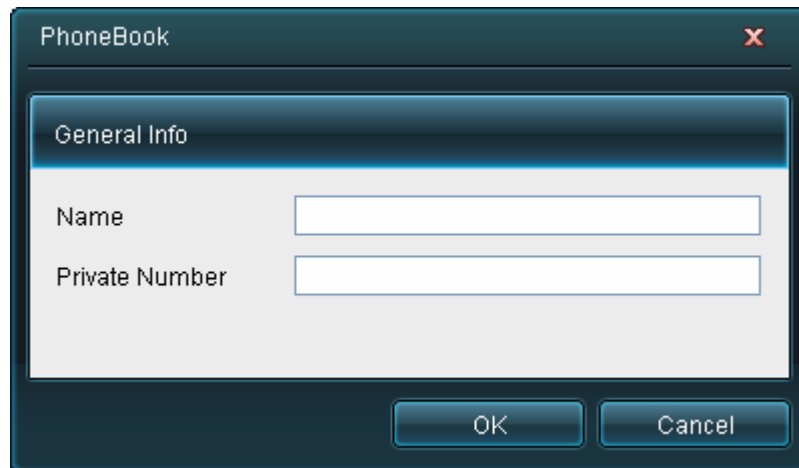

After synchronization between the phone and the PC(*A), you can click on one of folder on the tree to display contacts.

Press "Delete" button to delete the selected contacts.

Press "Insert" button to create a contact.

Press "Edit" button to edit the contact.

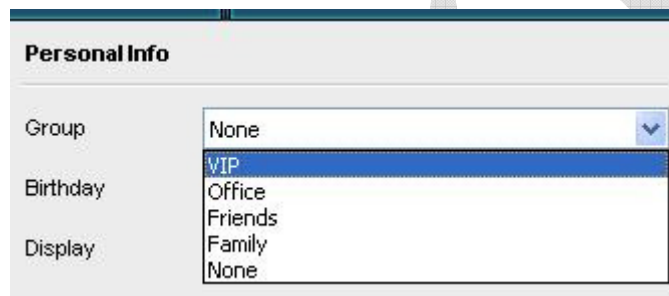

Contacts in SIM card have only two fields, Name and Private Number, SIM SIM Dialog in Figure 3 is provided to modify contacts in SIM card.

The image shows a 'PhoneBook' dialog box with a 'General Info' section. It contains two input fields: 'Name' and 'Private Number'. At the bottom, there are 'OK' and 'Cancel' buttons.

Figure 3

For editing contacts in the phone, Contact Dialog in Figure 4 is provided. When adding contacts in the phone, you have to choose which group the contacts will join.

The image shows a 'Contact Dialog' box with a 'Personal Info' section. It features a 'Group' dropdown menu with options: 'None', 'VIP', 'Office', 'Friends', 'Family', and 'None'. Below the dropdown, there are labels for 'Birthday' and 'Display'.

Figure 4

After grouping process, you could input other information of the contact.

Calendar

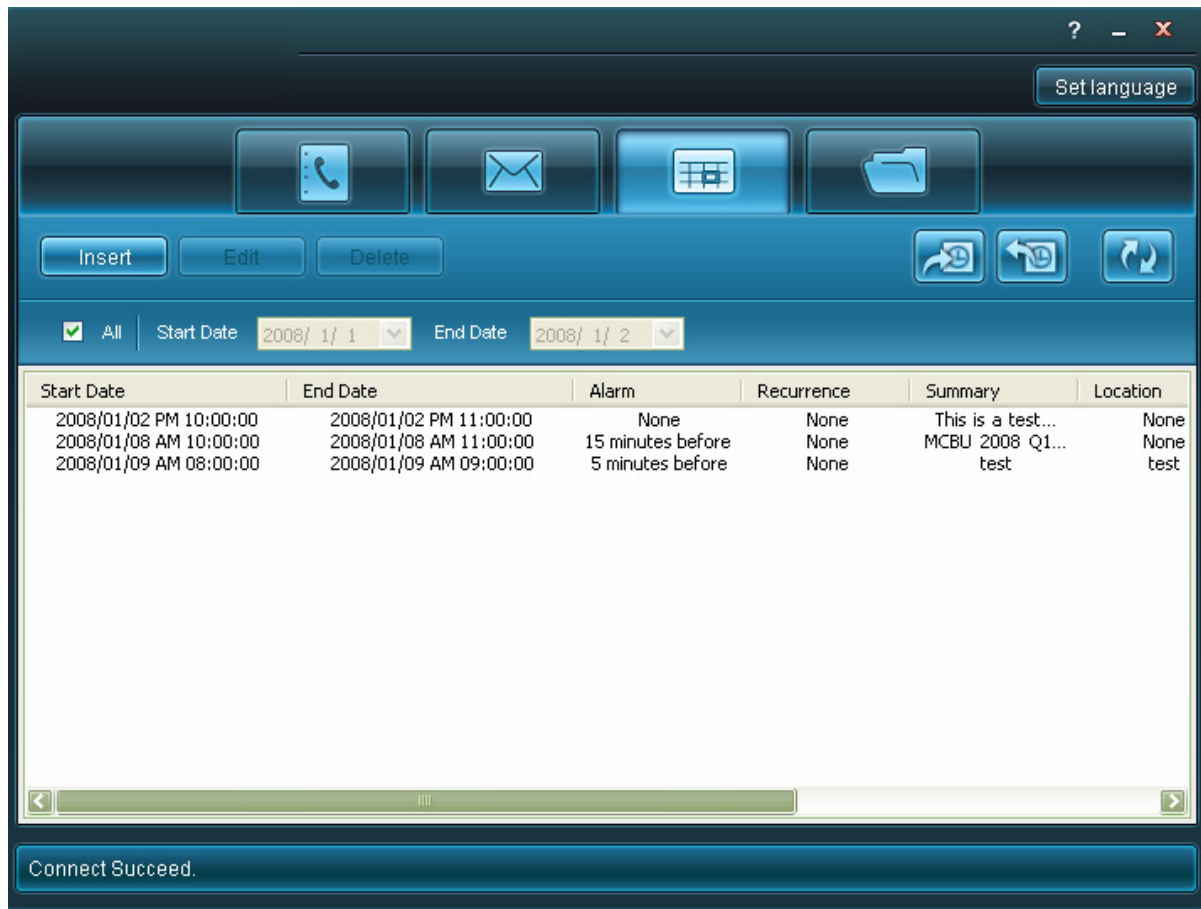

Figure 6

Submenu and buttons:

1. Insert: Insert a new appointment.
2. Edit: Edit the appointment.
3. Delete: Delete the appointment.

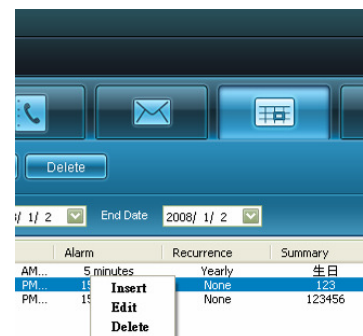

Figure 7

After the phone synchronizes with the PC (※A), you can see all events transferred from the mobile phone shown on the event list. If you'd like to read the events during the specific period, please un-check the item **All** first, and then select the period by using date picker. The events during that period are displayed in the bottom List windows.

To create an event, please click the "Insert" button. The Calendar dialog in Fig 5 pop up. Please fill in the corresponding information in each field. (Notice: Summary can't be empty!)

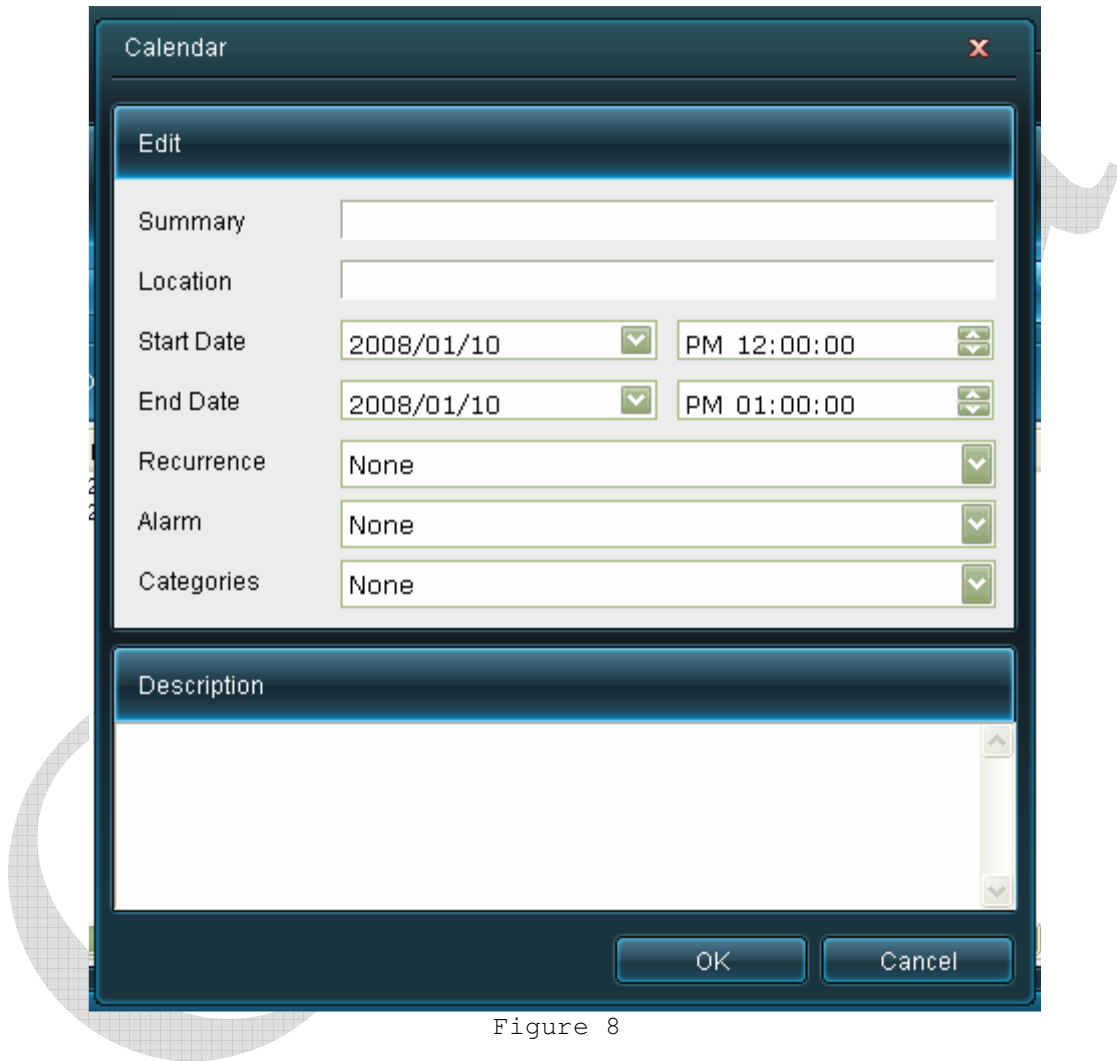

Figure 8

When selecting Start Date or End Date, Date picker window in Figure 9 is provided . Please pick a date of your event.

If you want this event to occur periodically, there are 4 kinds of type, Daily, Weekly, Monthly and Yearly you can choose.

| | |
|------------|---------|
| Recurrence | None |
| Alarm | None |
| Categories | Daily |
| | Weekly |
| | Monthly |
| | Yearly |

Figure 10

If you need an alarm to remind you of the event, please select one from the combo box. "1 minute before" means the mobile phone will alarm you 1 minute before the start time.

| | |
|------------|-------------------|
| Alarm | None |
| Categories | None |
| | 1 minute before |
| | 5 minutes before |
| | 10 minutes before |
| | 15 minutes before |
| | 30 minutes before |
| | 1 hour before |
| | 1 day before |

Figure 11

If you want to classify your event, there are several categories you can choose as below.

| | |
|------------|-------------|
| Categories | None |
| | None |
| | Appointment |
| | Business |
| | Education |
| | Holiday |
| | Meeting |
| | Misc. |
| | Personal |
| | Phone |
| | Sickday |
| | Special |
| | Travel |
| | Vacation |
| | Anniversary |

Figure 2

After completing those fields, please press "OK" to save this event. The new event will automatically be synchronized to the mobile phone, and also you can find it in the event list.

"Edit", "Delete" buttons are disabled by default. They could be enabled by the following condition:

"Edit" button is enabled when only one event is selected.

"Delete" button is enabled when any of events are selected.

You can edit an event by selecting that and clicking on the button Edit, or double clicking on the event.

File Manager

When you open File Manager, the following window will appear. If your mobile phone is connected to your PC, File Manager will synchronize with your mobile phone automatically. File Manager allows you to manage the files in your mobile phone easily. You can download important images to your PC, or upload images and music files by upload and download functions.

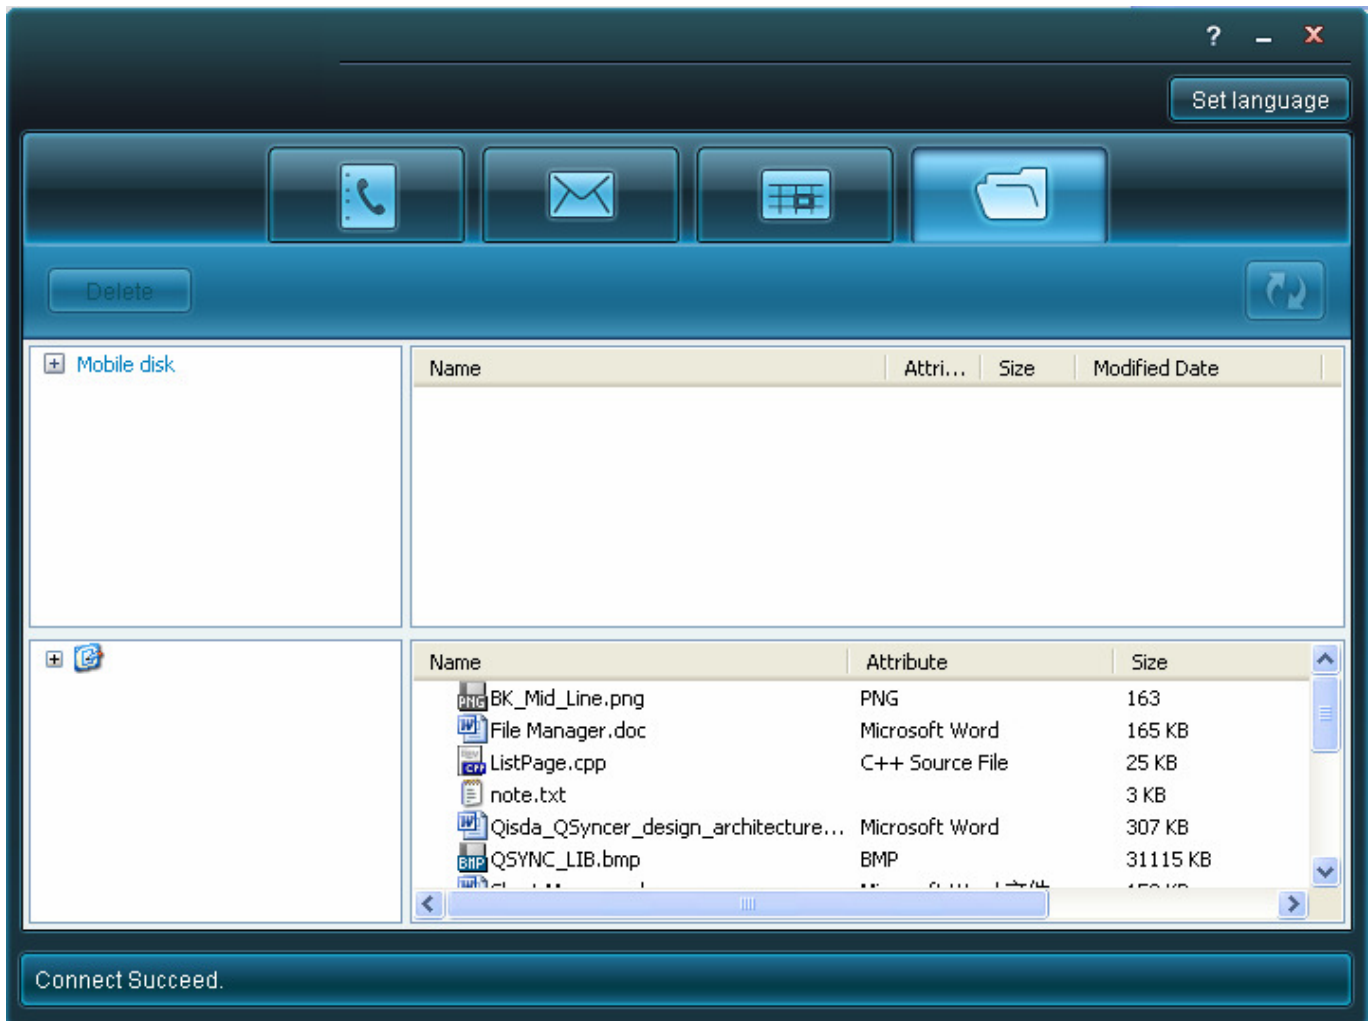

Figure 18

Double click on "Mobile disk" or click the button . The following list will appear. You can manage themes, games, and animations in your handset.

Miscellaneous folder: All.

Pictures folder: bmp, gif, png, jpeg, jpg, wbmp are supported.

Sounds folder: mid, mp3, mmf, imy, wav, aac, amr, xmf, 3gpp, mp4, midi, mpeg, smaf, wave are supported.

Videos folder: mp4, 3gp, sdp, 3gpp, 3g2, 3gpp2, mfpt are supported.

There are two File Manager windows. One is for the mobile phone. The other is for My Computer.

Top half window is File Manager for the mobile phone. Top left window shows the folders in the mobile phone. Top right window displays the file list in the mobile phone. Bottom half window is File Manager for the PC. Bottom left windows shows the folders in the PC. Bottom right windows reveal the file list. If you want to download files to your PC, please select the files you want to download.

You can drag the file from your handset to the PC or you can right-click on the file list and choose "Download".

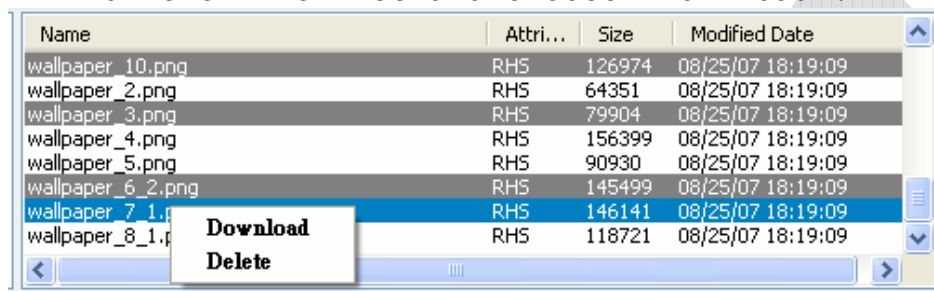

Figure 20

Similarly, you can upload the file from the PC to your handset. Just select the file and drag it to your handset.

If you want to delete the files in your handset, please select the files you want to delete and press the delete button, or you can right-click on the file list and choose "Delete".

In File Manager, it supports creating and deleting selected subfolders. Right click the tree item in the Mobile Phone view. A menu item pops up.

If you want to create a new folder, press "New Folder", and then the following window will appear.

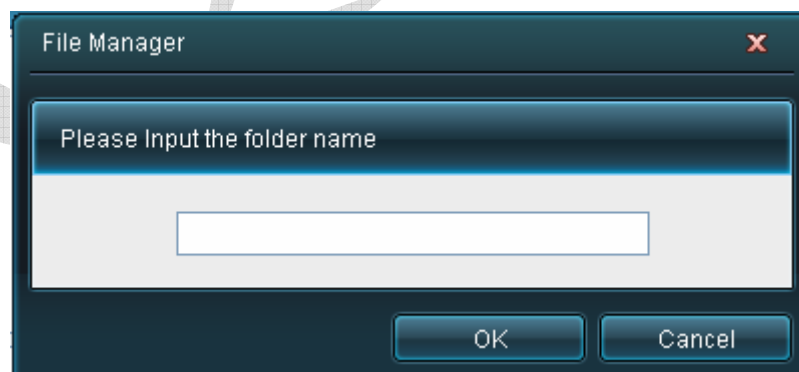

Figure 21

Input the folder name and press "OK", then the new folder will be created.

Similarly if you want to delete a folder, just select the folder and press the delete button, then the folder will be deleted.

Appendices

A: When to perform synchronization:

1. When QSyncer2 detects the connect event.
2. When switch view and had connected, if the view had not synchornized yet.

3. When press refresh button.

PS1: QSyncer2 will not get any notify if user operates handset directly, so we need refresh button.

PS2: Any change on QSyncer2 will notify to handset immediately.

B: Backup\Restore:

In Qsyncer2, we provide a method to drag events, contacts and SMS from the handset to the PC and vice versa. The events, contacts and SMS will be saved in the file extension "VCS", "VCF" and "QMSG" in the PC. The file with the file extension "VCS" and "VCF" are supported in Outlook. We will also register the file extension "VCS", "VCF", and "QMSG" with corresponding icons to make these file more viewable.

Moreover, all drag and drop operations are enabled when the phone is connected.

C: Outlook synchronization rule:

There are two kinds of synchronization for outlook.

1. One way sync from QSyncer2(source) to Outlook(destination)

2. One way sync from Outlook(source) to QSyncer2(destination)

The item in the target would be replaced with the item in the target when both sides have the same item. If not, upload the item from the source to the destination.

PS: 1. The comparison rule of Contact management is based on "First name and Second name".

2. The comparison rule of Calendar management is based on "Subject and Start time".
